

Why Choose Spears® Solvent Cements & Primers?

SOLV-2W-1013

Spears® is Your Single Source Manufacturer of Plastic Pipe, Fittings, Valves, & Solvent Cements

UNPARALLELED EXPERIENCE!

For over 45 Years, Spears® has Developed and Manufactured PVC and CPVC Piping Products Featuring the Unique Benefits of Solvent Cement Welding as a Joining Method. No Company Understands these Unique Benefits Better!

Unlike other chemical companies that only make “glue”, Spears® produces the “complete system package”. One name, one company. . . for reliability, traceability, product training, service and support.

Only Spears® Offers a *Lifetime Warranty* on Joints Properly Made with Spears® Cements & Primers

Progressive Products From Spears® Innovation & Technology

- Made in the USA in State-of-the-Art Facility
- NSF® Listed & Certified to Exacting ASTM Standards
- All Low VOC for LEED® Credit Conformance
- Complete Line of Accessories
- Unmatched Service & Availability

A Company Built on Experience Acquires Experience

Spears® Manufacturing Company is privately owned and built on the commitment and knowledge of its many long-term employees. When other companies merge or are acquired, there is often a replacement of long term management personnel; and the accumulated knowledge and expertise is lost. Spears® has been watchful of such situations and has grown its knowledge base by acquiring personnel with over 26 years of experience in this specialized field. Combined with Spears® ongoing product and materials improvement program, the most effective and useful varieties of cements and primers has resulted.

State-of-the-Art Facilities & Capacity

To further assure the best available product line, Spears® has invested heavily in developing a state-of-the-art facility computer controlled to formulate and blend the very best solvent cements, primers and cleaners. Moreover, this has allowed Spears® to quickly develop and produce any required solvent welding product with the capacity to rapidly adjust to fluctuations in market needs.

Unmatched Distribution & Service

Spears® maintains fourteen distribution centers across the United States to insure that product is available when you need it. Orders received by noon are shipped the same day. For years, Spears® has been the benchmark for quality and service in the thermoplastic piping products industry. Combined with a full staff of Technical Service Representatives as well as field Technicians, Spears® is prepared to tackle and solve your piping system problems.

Installation Instruction, Training & Certification

Spears® provides a full range of Solvent Cement Welding training in its instructions, booklets, videos, and direct hands-on group training classes. Spears® also conducts ASME B31.3 Bonder Qualification seminars and qualification testing for installer certification. Contact Spears® Technical Services for additional information or to schedule special training classes.

Simply the Best
